

QUANTUMQUARTZ

DESIGNER STONE

Quantum Quartz – the Ideal and Safe Benchtop Option

Quantum Quartz is a high quality engineered stone product that is certified compliant with the international Health and Safety Foundation sanitary standard (NSF) ensuring that it is safe for use in all food environments. For more information on NSF, please visit www.nsf.org.

A Quantum Quartz slab is typically made up of 90% quartz (silica) and 10% resin and pigment. The product is 100% safe for use in any home in its fabricated state with zero health risks with using the product as a benchtop or vanity.

Quantum Quartz is founding member of the Australian Engineered Stone Advisory Group (AESAG) and is committed to the safety of both its customers and fabricators.

Any cutting or fabrication of the Quantum Quartz engineered stone should be done by a suitability trained professional and as per the manufacturer's specification.

Should you have any questions about the safe work practices for cutting and fabricating engineered stone products please visit aesag.com.au.
